FEATURES

600 Watt professional grade power inverter kit. Allows connection from power inverter to battery bank. Plug & Play design. Best efficiency and highest safety level. Low maintenance. Strong and compact, THOR power inverters have been designed to support professionals looking for superior performance in an affordable package.

Pre-assembled, the Inverter kits allow for a quick, easy and safe installation of the high power THOR inverters and require no special tools. It is imperative, in any inverter's permanent installation, to use the appropriate material to get the best performance, prevent overheating and avoid added maintenance costs or damages. Use of THOR kits is highly recommended for all mobile applications to ensure superior safety and efficiency.

THOR offers the 600W, 1000W, 1500W, 2000W, 3000W and 5000W models with complete install kits.
